

## **Safety Works**

**Smoke Detectors** - When you 'Change your Clocks', remember to 'Change your Batteries' in the smoke detector(s) – even if you don't think the battery needs changing. You should test your smoke detector's batteries, following the manufacturer's instructions, once a month and replace any battery too weak to activate the alarm. By automatically changing your batteries when you change your clocks, you will ensure that the detector(s) will be working in case there is a fire. Make sure you dispose of the old batteries properly.
