

Spring Fling Benefit Dinner

In 2006, Joseph was diagnosed with a kidney disease called **Focal Segmental Glomerulosclerosis**. FSGS is named for the scarring, or "sclerosis", that can be found in the kidneys of people with this disease. As a result, his kidney is functioning at 18% and is in need of transplant.

His mother, *Early Head Start's Family Development Specialist Linda Gutierrez*, has been declared a match and will be giving her kidney to Joseph in June. All proceeds from this benefit dinner will be donated to Joseph and his family as they prepare for this life changing event.

Saturday, April 9, 2011
6:30 p.m.

Clovis Veterans Memorial Building
Liberty Ball Room
808 4th Street
Clovis, CA 93612
